

The following information is provided to assist individuals and companies performing any type of plumbing work within Brushy Creek Municipal Utility District.

Prior to performing any plumbing work, all applicable permit applications must be submitted by a registered plumber with current information on file with the District. A District issued Permit must be placed at a visible location at the site. Permit Form and associated fees can be found at [www.bcmud.org/CustomerService/Permits](http://www.bcmud.org/CustomerService/Permits). The plumber is responsible for ensuring all required inspections are scheduled with the inspector and passed by the District. All fees remaining at the end of the job will be assigned to the plumber.

Should any work require access through District property, a Permit Application for Trail and Easement Access must be completed.

Please carefully review the District's Sewer Line Backup Policy in the attached "Know your Sewer Line" brochure and be aware that on a single service, the homeowner's responsibility starts at the main and on a dual service, the homeowner's responsibility starts after the wye. District staff cannot perform work on private property.

The following documents are attached in order to assist you. These documents can also be found on the District's website at [www.bcmud.org/CustomerService](http://www.bcmud.org/CustomerService):

- Plumbing Permit Registration Form
- Water Heater Permit Application
- Water Softener Permit Application
- In Ground Swimming Pool Permit Application
- Plumbing / Sewer / Gas Repair Permit Application
- Trail and Easement Access permit Application
- Backflow Prevention Assembly Test and Maintenance Report
- Know your Sewer Line brochure
- District Map
